

## HOFGAS® - IFL4c

### Flare for operation under irregular conditions in keeping with gas-emission regulations

Standard flare for sewage- or biogas plants. Efficient and logical solution with systems operating under irregular conditions.

The HOFGAS<sup>®</sup> - IFL4c flare come to be used when express limits relating to gas emissions must be observed. Because of no visible flame, erection of the flare is most advantageous even near residential areas.

Automatic combustion control with changing pressure- or flow ratios. The plant is simple to operate, tune in, and starts reliably. The flare comes with the latest safety technology.

Is highly adaptable to irregular operating conditions.

HOFGAS®-IFL4c 1500

- ✓ Ideal for irregular operating conditions
- ✓ Automatic combustion control
- ✓ Emission levels are kept within current regulations (TA-Luft, EA Standards, etc.)
- ✓ Concealed flame
- ✓ Combustion temperature > 900°C
- ✓ Residence time ≥ 0.3s
- ✓ High standards of safety

#### General specifications

|  |                               |
|--|-------------------------------|
| Gas flow rate  | 60 - 4'000 Nm <sup>3</sup> /h |
| Burner capacity up to  | 32'000 kW                     |
| Methane concentration  | 60 - 75 vol. %                |
| Combustion temperature   | > 900 °C                      |
| Residence time   | > 0.3 s                       |
| Initial gas pressure   | 25 - 150 mbar                 |
| Expected sound pressure level at full load (at 15m distance and 2m height) | < 69 dB(A)                    |

#### Safety features

- Flame arrester
- Slam shut valve
- Burner control unit with UV detection
- Monitoring of temperature in combustion chamber

#### Site preparation

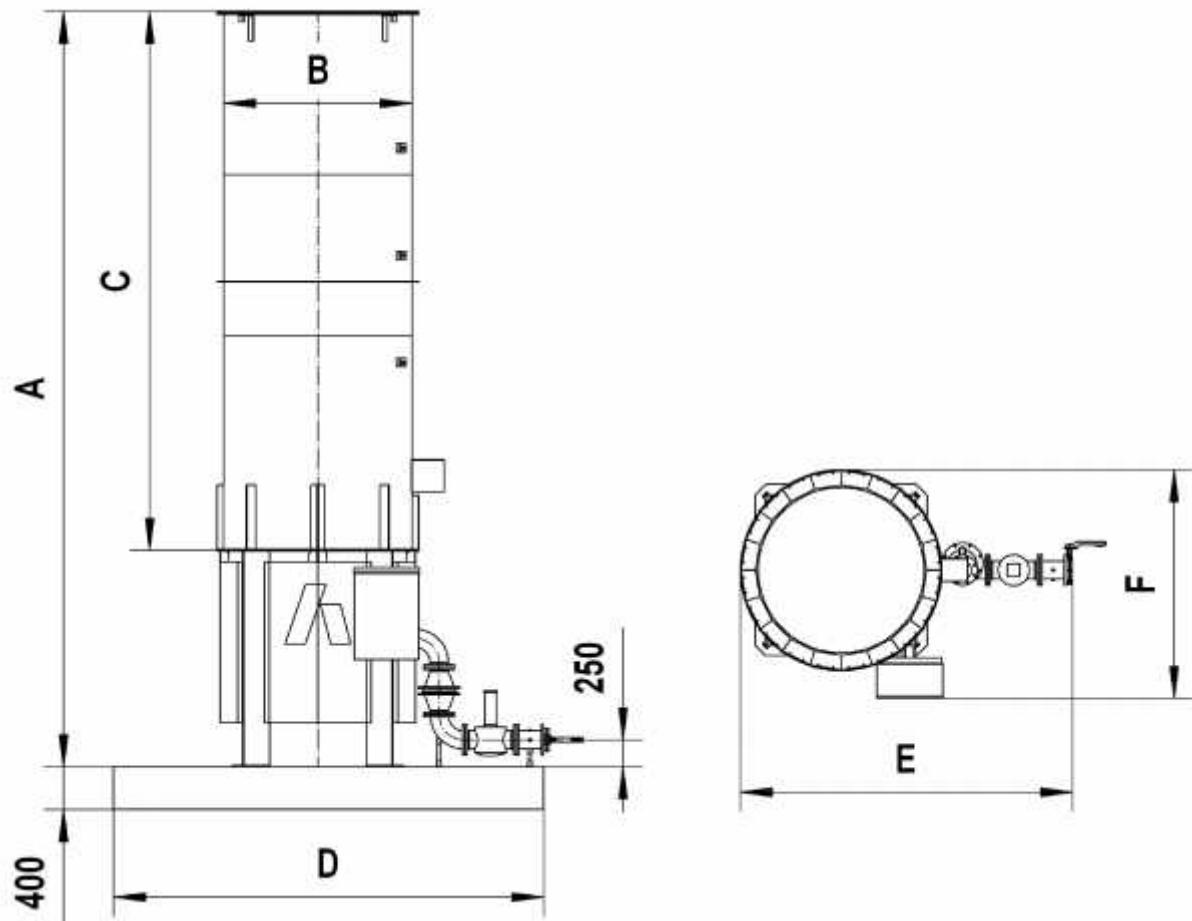

- Preparation of location (fence, access road etc.)
- Foundation
- Pre-dewatering
- Electricity supply
- Pipeline connection

#### Options

- Frost protection
- Low noise combustion

More options are available on request
